

AHCA/AHIMA ICD-10 Training for PDPM— *NON-CODER*

Course Syllabus

Module 1	ICD-10-CM Guidelines and Clinical Documentation Improvement (CDI) This module walks the participant through the general overarching ICD-10-CM coding guidelines, including coding conventions and rules. It then covers important aspects of CDI in general, and considerations for the skilled nursing facility. The overarching theme for this module is the importance of how the Patient Driven Payment Model (PDPM) is affected by high quality documentation and application of appropriate ICD-10-CM codes.
Module 2	Putting it All Together This module addresses the PDPM payment components. A case study is presented and the participant is guided through classifying the resident into clinical categories, determining the case-mix groups and converting them to the case-mix indices, and identifying the reimbursement utilizing the PDPM information.
